

GMT 458 – Web GIS

Assignment 1: Personal Web Page

Due: 12 October 2026

Peer-review deadline: 23 October 2026

Aim: The aim of this assignment is to familiarise students with HTML, CSS, and OpenLayers and Leaflet by creating their personal web pages. Each student will host his/her project on GitHub.

[GitHub Classroom has been retired!](#) 😞

I will be investigating Classroom 50.

Objectives:

- **HTML:**
 - Your web-site is comprised of at least **three different HTML files** (e.g. Background, Technologies, Projects, Social, etc.) (%15)
- **CSS:**
 - Animation (%10)
 - Tabular information with images (%10)
- **OpenLayers (OL):** Include OL on your web-page. An example is [here](#) (%10)
- **Leaflet:** Include another Leaflet map on your web-page (%10).
- Solve the two issues present in most web-based projects:
 - **Issue 1:** When there are many markers on the map, they may overlap. How can we set a zoom threshold so that markers only appear when the user zooms in beyond a certain level? (%10)
 - **Issue 2:** Earth repeating itself when zoomed out (%10).
- Regular use of Git – at least 3 commits on different days (%5)
- Overall quality (%10)
- **First understand and search the issues/problems you encounter on Google, and if you cannot resolve it, then use AI.**
 - Specify, the specific thing/issue you have learned from AI in your Readme.md.
 - Provide an estimate of the total AI usage in terms of minutes or hours to realise your project.

Evaluation:

- %85 - instructor
- %15 – blind peer review
 - Register to the review system: <https://gmt458.hacettepe.edu.tr/>

- Each student will review three other students' projects and provide feedback.
- The reviewers will remain anonymous.
- Detailed feedback to your peers will be rewarded.
- Failure of providing grades to your peers will be penalized substantially.
